

DPS-5290-59
COPY 1 OF 2

25X1

6 January 1959

SUBJECT: Proposed Modification of System 4 and
Associated Equipment

TO: Contracting Officer

Reference your letter DPS-5290 dated 5 November 1958 which forwarded the contractor's proposal for an improved Band 1 receiver for System 4 and modification of the System 4 test equipment and associated ground data reduction equipment. Our using activity has reviewed the proposal and has informed us that this increased capability is technically and operationally desirable. But because of the relatively high cost and distant availability of this modification, it is not considered feasible at this time to proceed with it. You are requested to advise the contractor of this decision.
